

• Partnership to jointly establish state-of-the-art centers for radionuclide imaging and clinical development of targeted radionuclide therapy

• Objective to accelerate precision medicine and novel targeted treatment of oncology and other therapy areas

**Geography - Strategic - December 14, 2023:** GE Healthcare and Miravex imaging have announced a strategic partnership, which will be a long-term relationship. The essential focus is to be patient, radionuclide therapy is a form of precision medicine where a radioactive substance is administered through the bloodstream through the bloodstream. This being, radionuclide therapy which combined a traditional cancer therapy. Recent years have seen rising growth in targeted radionuclide therapy.

Adding to its 2023 and 2024 set, Miravex imaging will open a new facility in 2023 and expand its R&D budget by 50%. The Danish-based company expects to employ over 100 people at the new facility by the end of 2023. The expansion will give the company the extra capacity it needs to meet growing demand in the radionuclide therapy area.

The partnership with GE Healthcare is significant to accelerate the success of Miravex imaging's growth plans by establishing capabilities for image production of drugs and R&D services for radionuclide therapy. Miravex imaging will be providing edge technology from GE Healthcare to improve the radionuclide therapy, including a custom - type of custom scanner used in precision medicine.

GE Healthcare will support Miravex imaging in its development of a new product for precision medicine, which is a new product for precision medicine. GE Healthcare and Miravex imaging will work in partnership to research and optimize manufacturing processes for new radionuclides by sharing knowledge and expertise related to technological innovation.

**Global Markets, Medical Devices, Regional Growth Strategy - GE Healthcare, Inc.:** "This new partnership will allow us to combine our expertise in precision medicine and our expertise in radionuclide therapy. GE Healthcare has, for many years, been a leader in precision medicine. Through our strategic and technological investments, we are building knowledge and capabilities that will enable precision medicine. We, together with Miravex imaging, can have the opportunity to further accelerate efforts in this space."

**Customer Relations, CEO and co-founder of Miravex imaging, said:** "Partnering with global leader GE Healthcare is a major milestone for Miravex imaging. Together, we have the capacity to build an even more robust foundation, supporting our vision to build and lead the way in the targeted therapy. There is only one way to build a foundation for the future."

GE Healthcare offers medical professionals the tools and support they need to improve patient outcomes and advance the practice of precision medicine. Through this partnership and a variety of other partnerships and solutions, GE Healthcare aims to further advance its role as a core partner in improving cancer care.

**About GE Healthcare:** GE Healthcare is a GE HealthCare business. GE Healthcare is a leading global medical technology, pharmaceutical diagnostic and digital solutions provider. GE Healthcare enables clinicians to make better, more informed decisions through intelligent devices, data analysis, applications and services, supported by robust software platforms. With over 100 years of healthcare innovation, experience and a record of 200+ innovations globally, the company operates in the areas of an imaging, patient care, precision health, digital health, life science, and precision medicine. GE Healthcare's products, health systems and services are used by more than 100 million patients worldwide.
