

GE Healthcare Awarded 2021 Best in KLAS in Cardiology IT

February 2, 2021

Centricity Cardiology Enterprise ranked first amongst competitors by the industry-trusted research and insights firm.

CHICAGO, Ill., February 2, 2021 – GE Healthcare has been named Best in KLAS for Cardiology IT by KLAS, an industry-trusted research and insights firm, for its **Centricity™ Cardiology Enterprise^[1]** solution. The [Best in KLAS 2021 Software and Services Report](#) ranks healthcare IT software and services vendors across numerous market segments based on information obtained from thousands of interviews KLAS conducts with providers and payers each month. Annually, these interviews represent the opinions of healthcare professionals and clinicians from more than 4,500 hospitals and 2,500 clinics, and account for 1,200 products and services from more than 450 vendors. Best in KLAS award signifies to the healthcare IT industry the commitment and partnership that the winning top vendor provides to their customers and to the healthcare community as a whole.

Cardiovascular disease is complex. Cardiovascular IT doesn't have to be. "We're committed to the cardiovascular care area and to our customers' success," said Christina Demur, General Manager, Cardiology IT, GE Healthcare. "We'd like to thank our customers for being on this journey with us. Customer feedback is very important to us and we're encouraged by the positive feedback."

Centricity Cardiology Enterprise is an integrated imaging and workflow solution that bridges the gaps between cardiovascular service lines and healthcare information systems with a single point of access for patient data, waveforms, images, analysis tools and physician reports – combined with powerful end-to-end management, analytics and workflow tools. GE Healthcare is driving new thinking and applying the best technology available to help cardiology and other imaging IT disciplines equip clinicians to provide the best patient care possible.

"Overall, GE has done a really good job with the service and the implementation. That has been an improvement from our previous vendor's service," said one healthcare manager interviewed by KLAS. "The structured reports for the cath aspect are much more simple and streamlined, and our physicians just have to click a few times. That is saving them a lot of time, and we also have full adoption from our cardiologists."^[2]
