Non-GAAP Financial Measures

The non-GAAP financial measures presented in this press release are supplemental measures of GE HealthCare's performance and its liquidity that the Company believes will help investors understand its financial condition, cash flows and operating results and assess its future prospects. The Company believes that presenting these non-GAAP financial measures, in addition to the corresponding U.S. GAAP financial measures, are important supplemental measures that exclude non-cash or other items that may not be indicative of or are unrelated to its core operating results and the overall health of the Company. These non-GAAP financial measures provide investors greater transparency to the information used by management for its operational decision-making and allows investors to see results "through the eyes of management." The Company believes that providing this information assists investors in understanding its operating performance and the methodology used by management to evaluate and measure such performance. When read in conjunction with the Company's U.S. GAAP results, these non-GAAP financial measures provide a baseline for analyzing trends in our underlying businesses and can be used by management as one basis for financial, operational, and planning decisions. Finally, these measures are often used by analysts and other interested parties to evaluate companies in our industry.

The Company defines these non-GAAP financial measures as:

- Organic revenue: Total revenues excluding the effects of: (1) net sales from recent acquisitions and divestitures with less than a full year of comparable net sales; and (2) foreign currency exchange rate fluctuations in order to present revenue on a constant currency basis.
- Organic revenue growth rate: Rate of change when comparing Organic revenue, period over period.
- Adjusted EBIT: Net income attributable to GE HealthCare excluding the effects of: (1) Interest and other financial charges – net; (2) Non-operating benefit costs; (3) Provision for income taxes; (4) Income (loss) from discontinued operations, net of taxes; (5) Net (income) loss attributable to noncontrolling interests; (6) restructuring costs; (7) acquisition and disposition related charges (benefits); (8) Spin-Off and separation costs; (9) (gain)/loss of business dispositions/divestments; (10) amortization of acquisition-related intangible assets; and (11) investment revaluation (gain)/loss. In addition, the Company may from time to time consider excluding other non-recurring items to enhance comparability between periods.
- Adjusted EBIT margin: Adjusted EBIT divided by Total revenues for the same period.
- Adjusted Net Income: Net income attributable to GE HealthCare excluding: (1) Non-operating benefit costs; (2) restructuring costs; (3) acquisition and disposition related charges (benefits); (4) Spin-Off and separation costs; (5) (gain)/loss of business dispositions/divestments; (6) amortization of acquisition-related intangible assets; (7) investment revaluation (gain)/loss; (8) tax effect of reconciling items (items 1-7); (9) impact of tax law changes and (10) Income (loss) from discontinued operations, net of taxes. In addition, the Company may from time to time consider excluding other non-recurring items to enhance comparability between periods.
- Free cash flow: Cash from (used for) operating activities - continuing operations adjusting for the effects of (1) additions to PP&E and internal-use software; (2) dispositions of PP&E; and (3) impact of factoring programs.
- Free cash flow conversion: Free cash flow divided by Adjusted Net Income.

Non-GAAP Financial Measures in Outlook

GE HealthCare calculates forward-looking non-GAAP financial measures including Organic revenue growth, Adjusted EBIT margin and Free cash flow conversion based on internal forecasts that omit certain amounts that would be included in GAAP financial measures. GE HealthCare does not provide reconciliations of these forward-looking non-GAAP financial measures to the respective GAAP metrics as it is unable to predict with reasonable certainty and without unreasonable effort items such as the impact of changes in currency exchange rates, impacts associated with business acquisitions or dispositions, timing and magnitude of restructuring activities and revaluation of strategic investments, amongst other items. The timing and amounts of these items are uncertain and could have a substantial impact on GE HealthCare’s results in accordance with GAAP.
