Non-GAAP financial measures

The non-GAAP financial measures presented in this press release are supplemental measures of GE HealthCare's performance and its liquidity that the Company believes will help investors understand its financial condition, cash flows, and operating results, and assess its future prospects. When read in conjunction with the Company's U.S. GAAP results, these non-GAAP financial measures provide a baseline for analyzing trends in GE HealthCare's underlying businesses and can be used by management as one basis for making financial, operational, and planning decisions. Descriptions of the reported non-GAAP measures are included below.

The Company reports Organic revenue and Organic revenue growth rate to provide management and investors with additional understanding and visibility into the underlying revenue trends of the Company's established, ongoing operations, as well as provide insights into overall demand for its products and services. To calculate these measures, the Company excludes the effect of acquisitions, dispositions, and foreign currency rate fluctuations.

The Company reports EBIT, Adjusted EBIT, Adjusted EBIT margin, Adjusted net income, and Adjusted earnings per share to provide management and investors with an additional understanding of its business by highlighting the results from ongoing operations and the underlying profitability factors, on a normalized basis. To calculate these measures the Company excludes, and reflects in the detailed reconciliations below, the following adjustments as applicable: Interest and other financial charges – net, Net (income) loss attributable to noncontrolling interests, Non-operating benefit (income) costs, Benefit (provision) for income taxes and certain tax related adjustments, and certain non-recurring and/or non-cash items. GE HealthCare may from time to time consider excluding other non-recurring items to enhance comparability between periods. Adjusted EBIT margin is calculated by taking Adjusted EBIT divided by Total revenues for the same period.

The Company reports Adjusted tax expense and Adjusted ETR to provide management and investors with a better understanding of the normalized tax rate applicable to the business and provide more consistent comparability across periods. Adjusted tax expense excludes the income tax related to the pre-tax income adjustments included as part of Adjusted net income and certain income tax adjustments, such as adjustments to deferred tax assets or liabilities. The Company may from time to time consider excluding other non-recurring tax items to enhance comparability between periods. Adjusted ETR is Adjusted tax expense divided by income before income taxes less the pre-tax income adjustments referenced above.

The Company reports Free cash flow and Free cash flow conversion to provide management and investors with an important measure of the ability to generate cash on a normalized basis and provide insight into the Company's flexibility to allocate capital. Free cash flow is Cash from (used for) operating activities – continuing operations including cash flows related to the additions and dispositions of property, plant, and equipment ("PP&E") and additions of internal-use software. Free cash flow does not represent residual cash flows available for discretionary expenditures, due to the fact that the measure does not deduct the capital required for debt repayments. Free cash flow conversion is calculated by taking Free cash flow divided by Adjusted net income.

Management recognizes that these non-GAAP financial measures have limitations, including that they may be calculated differently by other companies or may be used under different circumstances or for different purposes. In order to compensate for the discussed limitations, management does not consider these measures in isolation from or as alternatives to the comparable financial measures determined in accordance with U.S. GAAP. The detailed reconciliations of each non-GAAP financial measure to the most directly comparable U.S. GAAP financial measure are provided below, and no single financial measure should be relied on to evaluate our business.

Non-GAAP financial measures in outlook

GE HealthCare calculates forward-looking non-GAAP financial measures, including Organic revenue growth, Adjusted EBIT margin, Adjusted ETR, Adjusted EPS, and Free cash flow based on internal forecasts that omit certain amounts that would be included in U.S. GAAP financial measures. GE HealthCare does not provide reconciliations of these forward-looking non-GAAP financial measures to the respective U.S. GAAP metrics as it is unable to predict with reasonable certainty and without unreasonable effort certain items such as the impact of changes in currency exchange rates, impacts associated with business acquisitions or dispositions, timing and magnitude of restructuring activities, and revaluation of strategic investments, amongst other items. The timing and amounts of these items are uncertain and could have a substantial impact on GE HealthCare's results in accordance with U.S. GAAP.

Key performance indicators

Management uses the following metrics to provide a leading indicator of current business demand from customers for products and services.

- Organic orders growth: Rate of change period-over-period of contractual commitments with customers to provide specified goods or services for an agreed upon price, and excluding the effects of: (1) recent acquisitions and dispositions with less than a full year of comparable orders; and (2) foreign currency exchange rate fluctuations in order to present orders on a constant currency basis.
- Book-to-bill: Total orders divided by Total revenues within a given financial period (e.g., quarter or FY).
