The non-GAAP financial measures presented in this press release are supplemental measures of GE HealthCare's performance and its liquidity that the Company believes will help investors understand its financial condition, cash flows, and operating results, and assess its future prospects. When read in conjunction with the Company's U.S. GAAP results, these non-GAAP financial measures provide a baseline for analyzing trends in GE HealthCare's underlying businesses and can be used by management as one basis for making financial, operational, and planning decisions. Descriptions of the reported non-GAAP measures are included below.

Management recognizes that these non-GAAP financial measures have limitations, including that they may be calculated differently by other companies or may be used under different circumstances or for different purposes. In order to compensate for the discussed limitations, management does not consider these measures in isolation from or as alternatives to the comparable financial measures determined in accordance with U.S. GAAP. No single financial measure should be relied on to evaluate our business.
